OSHA Update

CAK Safety Council

April 25, 2018

Howie Eberts
OSHA Area Director
Cleveland Area Office

OSHA's Continuing Mission

- More than **4,000** Americans die from workplace injuries every year.
- Perhaps as many as **50,000** workers die from illnesses in which workplace exposures were a contributing factor.
- More than **3 million** workers suffer a serious non fatal injury or illness annually.

Former Senior Policy Advisor for the House
Committee on Education and the Workforce

Federal OSHA

- OSHA Staff: ~~2,305~~ 1,800?
- Workers: 130 million
- Worksites: 8 million
- Regional Offices: 10
- Local Area Offices: 90

Federal OSHA Ohio Offices

- OSHA Inspectors: ~~58~~52
- Workers: 5.0 million
- Worksites: 287,865
- Local Area Offices: 4
 - Toledo
 - Columbus
 - Cleveland
 - Cincinnati

Targeting High Risk Hazards

Workplace Fatality Data

Number of fatal work injuries by employee status, 2003–16

- A total of 5,190 workers died from an occupational injury in 2016.
- This number increased by 7 percent from 2015 and is the highest count since 2008.
- Self-employed workers have consistently accounted for around one-fifth of fatal work injuries.

Rate of fatal work injuries per 100,000 full-time equivalent workers by employee status, 2006–16

- The 2016 all-worker fatal work injury rate was 3.6 fatal work injuries per 100,000 full-time equivalent workers (FTEs).
- The rate for self-employed workers has consistently been higher than that of all workers since the adoption of hours-based rates.

Note: Rate = (Fatal work injuries/Total hours worked by all workers) x 200,000,000 where 200,000,000 = base for 100,000 full-time equivalent workers (FTEs) working 40 hours per week, 50 weeks per year. The total hours worked are annual average estimates from the Current Population Survey (CPS).

In 2008, CFOI implemented a new methodology, using hours worked for fatal work injury rate calculations rather than employment. For additional information on the fatal work injury rate methodology, please see www.bls.gov/iif/oshnotice10.htm.

Source: U.S. Bureau of Labor Statistics, Current Population Survey, Census of Fatal Occupational Injuries, 2017.

Fatal occupational injuries by major event, 2016

- More fatal work injuries resulted from transportation incidents than from any other event in 2016.
- Roadway incidents alone accounted for about one out of every four fatal work injuries.

Fatal work injuries and hours worked by gender of worker, 2016

Fatal work injuries = 5,190

Hours worked = 283,100,855,820

- A disproportionate share of fatal work injuries involved men relative to their hours worked in 2016.
- Men had a fatal work injury rate of 5.8 deaths per 100,000 full time equivalent workers while the rate for women was 0.6.

Distribution of fatal injury events by gender of worker, 2016

- Women experienced a higher proportion of fatal injuries due to homicides and exposure to harmful substances and environments relative to men.
- Men incurred a higher proportion of injuries from roadway incidents; falls, slips, and trips; and contact with objects and equipment.

Rate of fatal work injuries per 100,000 full-time equivalent workers by age group, 2016

- Workers age 65 and over had the highest fatal injury rate of all workers.
- The largest number of fatal work injuries involved workers in the 55 to 64 and 45 to 54 age groups.

Number and rate of fatal work injuries by industry sector, 2016

- Private construction had the highest count of fatal injuries in 2016, but the private agriculture, forestry, fishing and hunting sector had the highest fatal work injury rate.

Note: Fatal injury rates exclude workers under the age of 16 years, volunteers, and resident military. The number of fatal work injuries represents total published fatal injuries before the exclusions. For additional information on the fatal work injury rate methodology, please see www.bls.gov/iif/oshnotice10.htm.

Source: U.S. Bureau of Labor Statistics, Current Population Survey, Census of Fatal Occupational Injuries, 2017.

Civilian occupations with high fatal work injury rates, 2016

- In 2016, fatal work injury rates were high for logging workers and fishers and related fishing workers.
- Driver/sales workers and truck drivers incurred the greatest number of fatal injuries.

Improving Tracking Final Rule: Timeline Dec.2017

- Final Rule Federal Register Notice – May 12, 2016
- Employee Rights effective date – August 10, 2016 (enforcement delayed to Dec. 1, 2016)
- Electronic Reporting effective date – January 1, 2017
- Phase-in data submission due dates

As of August 1st, the online electronic submission applications is working. Updates will be posted to the OSHA website at www.osha.gov/recordkeeping when they are available.

Submission year	Establishments with 250 or more employees in industries covered by the recordkeeping rule	Establishments with 20-249 employees In select industries	Submission deadline
2017	CY 2016 300A Form	CY 2016 300A Form	July 1, 2017
2018	CY 2017 300A, 300, 301 Forms	CY 2017 300A Form	July 1, 2018
2019 and beyond	300A, 300, 301 Forms	300A Form	March 2

National Monthly Violation Metrics Federal OSHA

Higher OSHA Penalties

- As of Aug. 1, 2016, the penalties OSHA can impose increased. This was a one-time catch-up adjustment.
- There will also be annual adjustments based on inflation. New penalty amounts as of Jan. 13, 2018:

Type of Violation	Penalty
Serious	\$12,675 \$12,934 per violation
Failure to Abate	\$12,675 \$12,934 per day beyond the abatement date
Willful or Repeated	\$126,749 \$129,340 per violation

Questions???

The image features a central logo for OSHA (Occupational Safety and Health Administration). The logo consists of a stylized 'O' with a blue and yellow circular design inside, followed by the letters 'S', 'H', and 'A' in a bold, black, serif font. A registered trademark symbol (®) is positioned to the upper right of the 'A'. The background is a grid of 24 panels, each containing a white line-art illustration of a worker in various occupational settings, such as using tools, operating machinery, or handling materials. The panels are color-coded in a grid pattern of yellow, orange, green, and blue.
