Noise Training Micro Videos Training Series Guide

This micro video training series is designed to assist with required noise training and provide reference for related questions. Contact your BWC Safety Consultant or Industrial Hygienist if you have further questions.

Have employees view the short videos by sharing the video links below. After viewing the series, employees can complete the knowledge assessment to verify competence and have an opportunity to ask questions. Below, shaded, are the answers to the assessment questions. Completed assessments can be retained for employee training records. You can address any deficiencies or questions in either a one-on-one or group setting.

Noise Training - The Effects on Hearing (Watch video)

- 1. Is noise-induced hearing loss permanent? Yes
- 2. What are the first signs of hearing loss? Have trouble hearing people talk when there is background noise, people sound like they are mumbling, ask people to repeat, turn up the radio or TV a lot, difficulty hearing people on the phone, constant ringing in your ears
